

## The Solventum™ Cloud Platform

- Manages cloud hosting for Solventum applications
- Reduces IT burden with automated updates, strong security and 24/7 monitoring
- Improves reliability and scalability with a modern, flexible cloud infrastructure

### Solventum solutions in the cloud

- Solventum™ 360 Encompass™ System
- Solventum™ Coding and Reimbursement System (CRS)

At Solventum, we're passionate about enabling better, smarter, safer healthcare to improve lives. We're rooted in decades of diverse expertise. As healthcare systems increasingly adopt cloud technologies, our approach emphasizes stability, security and continuity, helping organizations navigate change with confidence.

## The challenge: Moving to a cloud-based solution

Healthcare organizations that maintain their infrastructure on-premises continue to face an increasing strain on their IT teams. Managing patches, troubleshooting downtime and keeping up with regulatory updates all demand time, expertise and resources that are already stretched thin. These operational tasks not only slow innovation, but divert focus from strategic initiatives as well, distracting from the bigger goal of supporting clinicians and delivering exceptional patient care.

## The solution: Managed services that take away the worry (and the work)

The Solventum Cloud Platform, powered by Amazon Web Services (AWS), shifts applications to a secure, fully managed environment. Solventum takes on day-to-day operations, including updating, monitoring, scalability and uptime so your team doesn't have to. The result is a reliable, modern cloud experience designed to reduce IT burden, improve system performance and offer agility to grow and innovate without disruption.

## Key benefits of Solventum Cloud Services

Protect data by design: Safeguard patient information through encryption in transit and at rest, aligned with AWS best practices and supported by strong security and availability controls

Ensure dependable availability: Manage and maintain the cloud solution and underlying infrastructure using AWS and Solventum best practices to help maximize uptime

Deliver consistently strong performance: Match or exceed the performance of traditional on-premises environments without added complexity

Rely on security you can trust: Solventum is SOC 2 certified

Reduce operational burden: Shift application environment and process management to Solventum experts, allowing internal IT teams to focus on higher-value organizational priorities

Simplify cost management: Offer a single, transparent fee structure that eliminates surprise expenses and unplanned hardware investments

### Flexible cloud technology

Stay secure, current, and resilient with cloud technology designed to run reliably in real time. Reduced maintenance and a more efficient implementation mean less operational burden for your teams, freeing time and resources to focus on patients, not platforms.

## Contact Solventum today

For more information on how our software and services can assist your organization, contact your Solventum sales representative, call us at 800-367-2447, or visit us online at [Solventum.com](https://www.solventum.com).
