

It's time to make the switch from gauze and tape to 3M™ Tegaderm™ Transparent Film Dressings for IV sites

Multiple studies have shown that compared to gauze and tape, transparent film dressings can help increase catheter dwell time and reduce IV-related complications.^{1,2,3} All Tegaderm brand film dressings can help you meet best practice recommendations for the minimum standard of IV care and maintenance.⁴

Find the right Tegaderm transparent film dressing for your clinical practice

3M™ Tegaderm™ Transparent Film Dressing

Commonly used to protect IV catheter sites and wounds, secure devices to the skin and maintain a moist environment for wound healing.

3M™ Tegaderm™ Diamond Pattern Film Dressing

Balances breathability with effective adhesion to secure and protect IV and wound sites, even in hot, humid conditions and on diaphoretic patients.

3M™ Tegaderm™ HP Transparent Film Dressing

Provides extra holding power for challenging conditions including skin with moderate amounts of moisture.

Explore the world of Tegaderm dressings

For over 40 years, we've collaborated with healthcare professionals to create unique innovations that give you what you need to protect every IV catheter – from insertion to removal.

Antimicrobial and advanced catheter securement dressing options

3M™ Tegaderm™ CHG Chlorhexidine Gluconate I.V. Securement Dressing

This dressing is cleared and proven to reduce catheter-related bloodstream infections (CRBSIs) in patients with central venous and arterial catheters. It also offers site visibility, consistent application and catheter securement.

3M™ Tegaderm™ I.V. Advanced Securement Dressing

Features include a deep notch, stabilization border, and dual adhesive technology to provide the comfort and protection your patients deserve. This dressing meets the Infusion Therapy Standards of Practice definition of an integrated securement device (ISD).
