

CARE AND MAINTENANCE GUIDE

CARE AND MAINTENANCE OF MARVELLAIRE PANELS, SHOWER PANS, AND ACCESSORIES

Marvellaire Panels feature a durable gel-coat finish and a non-porous surface that resists staining and is easy to maintain. Marvellaire panels are groutless making them easy to clean and do not require regrouting or resealing. Routine cleaning is simple and typically requires only a soft cloth or sponge and a non-abrasive aerosol foam cleaner to keep the panels looking their best for years of reliable service.

Do **not** use harsh or abrasive cleaners, as they are unnecessary and may damage the surface finish. For best results, clean the panels using only non-abrasive cleaning products and soft materials.

DAILY CLEANING

For routine daily cleaning, use a non-abrasive cleaner such as mild soap and water, glass cleaner, foam cleaner, or a melamine foam sponge.

Removing Water Marks

Water marks can be removed by wiping the surface with a damp cloth and then drying it thoroughly with a clean, soft towel.

Cleaning Tough Stains from Marvellaire Panels

Recommended Cleaning Method - by hand:

1. Soak rag/paper towel in rubbing alcohol (70% IPA).
2. For panels in a horizontal position leave the soaked rag on the stain for 15 minutes.
3. For panels in a vertical position you can use saran wrap over the soaked rag to keep in place.
4. Remove and wipe.
5. Repeat steps 1-4 until stain is removed.

If stain remains after following steps 1-4 you can use bleach diluted with water:

1. Dilute bleach with water per manufacturer's suggestion.
2. For panels in a horizontal position apply bleach dilution with a sponge and let it sit for 2 hours.
3. For panels in a vertical position, you can use saran wrap over the sponge to keep in place and let sit for 2 hours.
4. Wipe off with a clean sponge.
5. Repeat steps 1-2 until desired results are reached.

CARE AND MAINTENANCE GUIDE

ROUTINE MAINTENANCE

Proper routine maintenance will help preserve the appearance and performance of your Marvellaire Panels, Shower pans, and accessories.

Matte Surfaces

Periodically restore the finish by lightly rubbing the surface with a general-purpose scouring pad, then clean using the **Daily Cleaning** method.

Glossy Surfaces

To maintain a high-gloss appearance, periodically buff the surface using a polishing compound or an automotive-grade polishing compound.

Textured Surfaces

Clean periodically using the **Daily Cleaning** method to remove dirt and maintain the surface's appearance.

Note: Always test cleaning and polishing products in an inconspicuous area before applying them to the entire surface. Follow the manufacturer's instructions for all maintenance products.

MINOR CUTS AND SCRATCHES

Minor surface damage can typically be repaired using standard sanding and finishing techniques appropriate for the panel's surface texture.

Matte and Textured Surfaces

1. Lightly sand the damaged area using 400-grit sandpaper until the cut or scratch is minimized.
2. Restore the surface finish by following the applicable **Routine Maintenance** procedure for the surface finish type.

Glossy Surfaces

1. Use a random-orbit sander with 400-grit sandpaper to carefully sand the damaged area and remove minor cuts and scratches.
2. After sanding, restore the gloss by buffing the surface with a polishing compound or automotive-grade polishing compound until the desired finish is achieved.

Important: Always sand gently and evenly to avoid creating low spots or uneven surface textures. Test repair methods in an inconspicuous area when possible before proceeding with visible surfaces.

WARNING

This product can expose you to chemicals known to the State of California to cause cancer, including crystalline silica (airborne particles of respirable size). For more information, go to www.P65Warnings.ca.gov.

Este producto puede exponerlo a sustancias químicas reconocidas por el Estado de California como causantes de cáncer, incluida la sílice cristalina (partículas suspendidas en el aire de tamaño respirable). Para obtener más información, visite www.P65Warnings.ca.gov.

Ce produit peut vous exposer à des substances chimiques reconnues par l'État de Californie comme pouvant causer le cancer, notamment la silice cristalline (particules en suspension dans l'air de taille respirable). Pour plus d'informations, consultez www.P65Warnings.ca.gov.

DANGER

Dust generated during fabrication and installation processes contains crystalline silica (SiO₂) particles and workers who inhale such hazardous dust are at risk for **silicosis, lung cancer, chronic obstructive pulmonary disease (COPD) and kidney disease**.

PREVENTION

Fabricators and workers are to utilize proper preventative measures in fabrication, clean-up, installation and removal processes, including but not limited to any applicable regulations from the U.S. Occupational Safety and Health Administration and state or local authorities. **Avoid inhalation of dust and use adequate ventilation** during fabrication, clean-up, installation and removal. **Do not dry cut or use dry methods! Use wet methods** to reduce generation of dust. Use a properly fitted particulate respirator that meets or exceeds applicable regulations during fabrication, clean-up, installation and removal. Health and safety regulations set dust limitations and may require you to comply with additional preventative measures. Do not allow any individuals in the workplace without proper protection. Read Safety Data Sheet Instructions for additional safety information (www.daltile.com) Lisez les instructions de la FDS pour obtenir des informations supplémentaires sur la sécurité. (www.daltile.com).

CAUTION

Panels are very heavy! Serious injury or death may result from uncontrolled movement or improperly secured panels that may tip, sway, or fall during transportation, storage, or handling. Stay away from the PANELS fall shadow at all times.

PRECAUCIÓN

¡Los paneles son muy pesados! Pueden producirse lesiones graves o la muerte debido al movimiento incontrolado o a paneles que no estén correctamente asegurados y que puedan inclinarse, balancearse o caer durante el transporte, almacenamiento o manipulación. Manténgase siempre alejado de la zona de caída del panel.

ATTENTION

Les panneaux sont très lourds! Des blessures graves ou la mort peuvent survenir en raison d'un mouvement incontrôlé ou de panneaux mal sécurisés susceptibles de basculer, de se balancer ou de tomber pendant le transport, l'entreposage ou la manutention. Tenez-vous toujours à l'écart de la zone de chute du panneau.
