Purevana Mineral Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

APPLICATION NOTES:

Purevana Mineral Surfaces not suitable for exterior applications due to small resin content. The sun will etch the material.

NOTES

Purevana Mineral Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

Purevana Mineral Surfaces products are virtually maintenance free.

Purevana Mineral Surfaces products provide consistent color and visual movement. A wide range of color options allow for more design freedom.

Purevana Mineral Surfaces products have a durable, scratch-resistant surface.

Purevana Mineral Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).
