# La Gamma Nebula

The image displays the Nebula Control Center (NCC) interface and its associated hardware. The NCC dashboard provides a comprehensive overview of the network status, including:

- Site network status at a glance:** Shows the status of various components: Internet (Offline), Mobile Router (Offline), Firewall (Online, 1/1, CPU 93%), Switch (Online, 11/12, Loading 0%), Access point (Online, 4/5, Loading 0%), and Clients (Wireless 4, Wired 5).
- APs (by usage):** Shows 10 Clients and 2.9 GB Traffic.
- SSIDs by usage:** Shows COZY - TPE (11.4 GB) and COZY - WFI (526 MB).
- PoE power:** Shows 20% Consumed and 180w Total.
- AP application usage:** Shows Windows Update (280.7 MB), HTTPS (60.3 MB), Microsoft Office (58.1 MB), and Google (49.5 MB).

The hardware components shown include:

- UTM Firewall:** A rack-mounted device for unified threat management.
- Switch:** A rack-mounted network switch.
- Access Point:** A white, wall-mountable wireless access point.
- Mobile App:** A smartphone displaying the NCC mobile application interface.
- Secured Cloud Router:** A white, wall-mountable cloud-managed router.
- Mobile Router:** A white, wall-mountable mobile router.

---

# Sfide per un MSP

Molti clienti e silos di prodotti e console (cloud e on-prem)

Controllo e gestione unificata e centralizzata

Deploy lunghi e sostituzione complessa

Zero Touch Provisioning

Frammentazione della gestione

Gestione Multi-Site nativa

# La soluzione

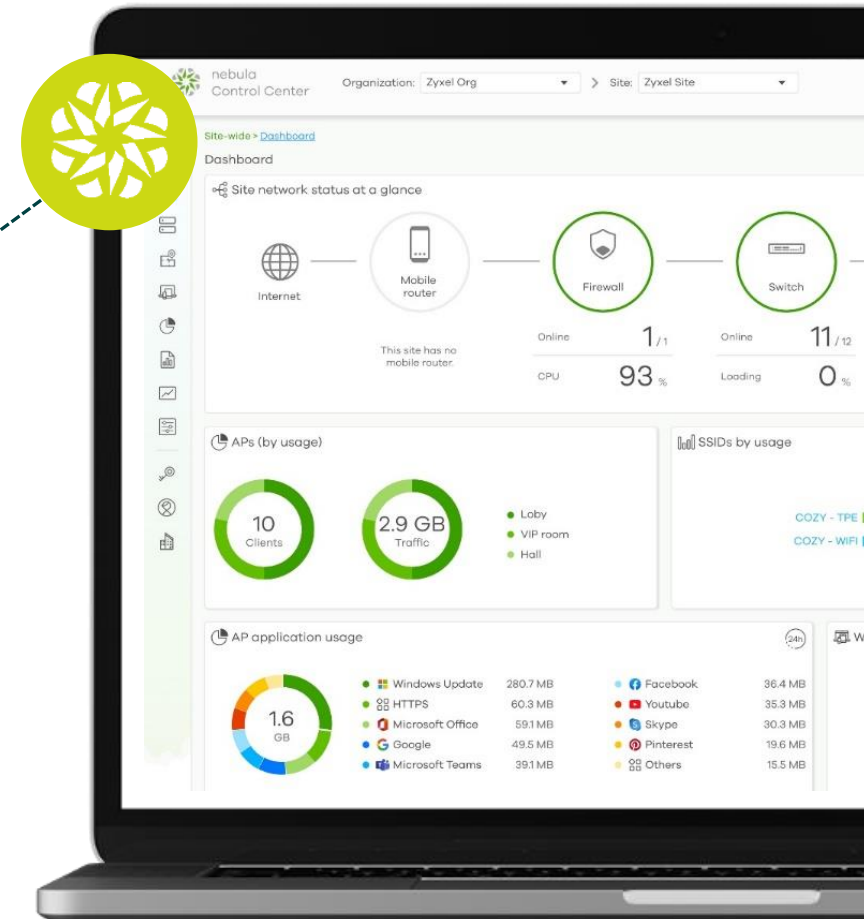

## Nebula - The First Full-Stack Cloud Networking Solutions For SMB

100% cloud, achieve true ease of use.

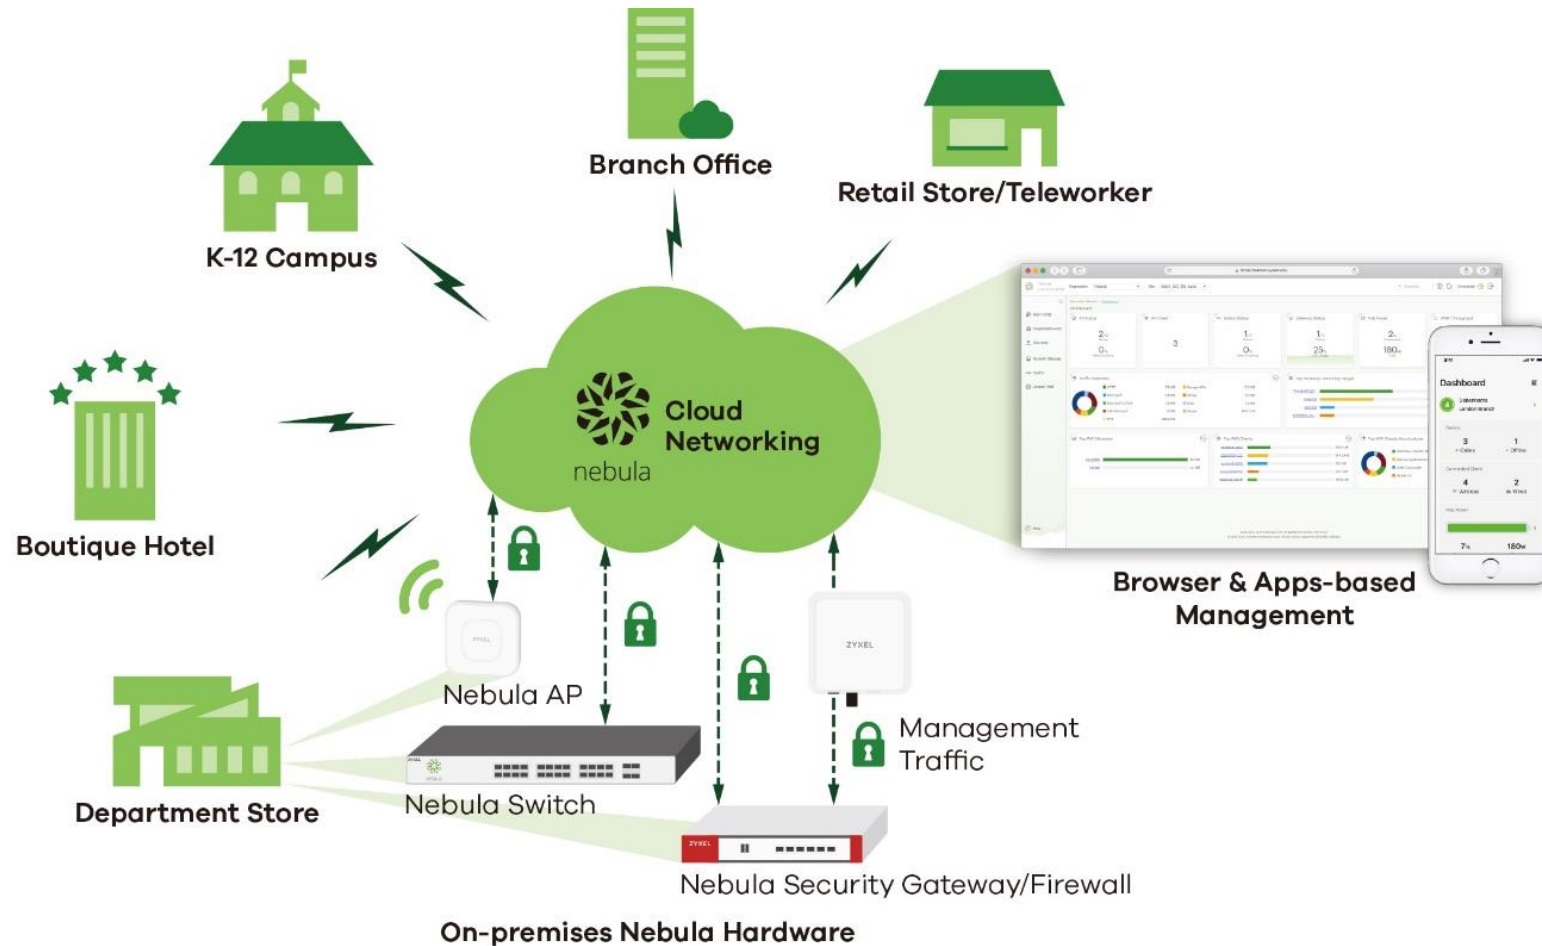

Launched in 2016.

100+ products supported.

Completed products from Router, Security, Switch to WLAN and FWA.

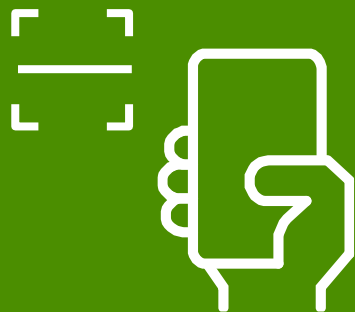

# Perché Nebula

## CONFIGURE

Organization & Site/s

## SCAN

Register Device/s  
Via NCC or APP

## CONNECT

Nebula Device/s

## MANAGE

# Up and running in Minutes!

Nebula First Time Wizard helps create your org/site and ensure quick, complete, and easy network setup with only a few simple clicks! Your devices will be up and running in minutes.

# Pre-configure without unboxing

Register your device via NCC or via the App by either entering the serial number and MAC address or by scanning the QR code and configure the device without even unboxing it!

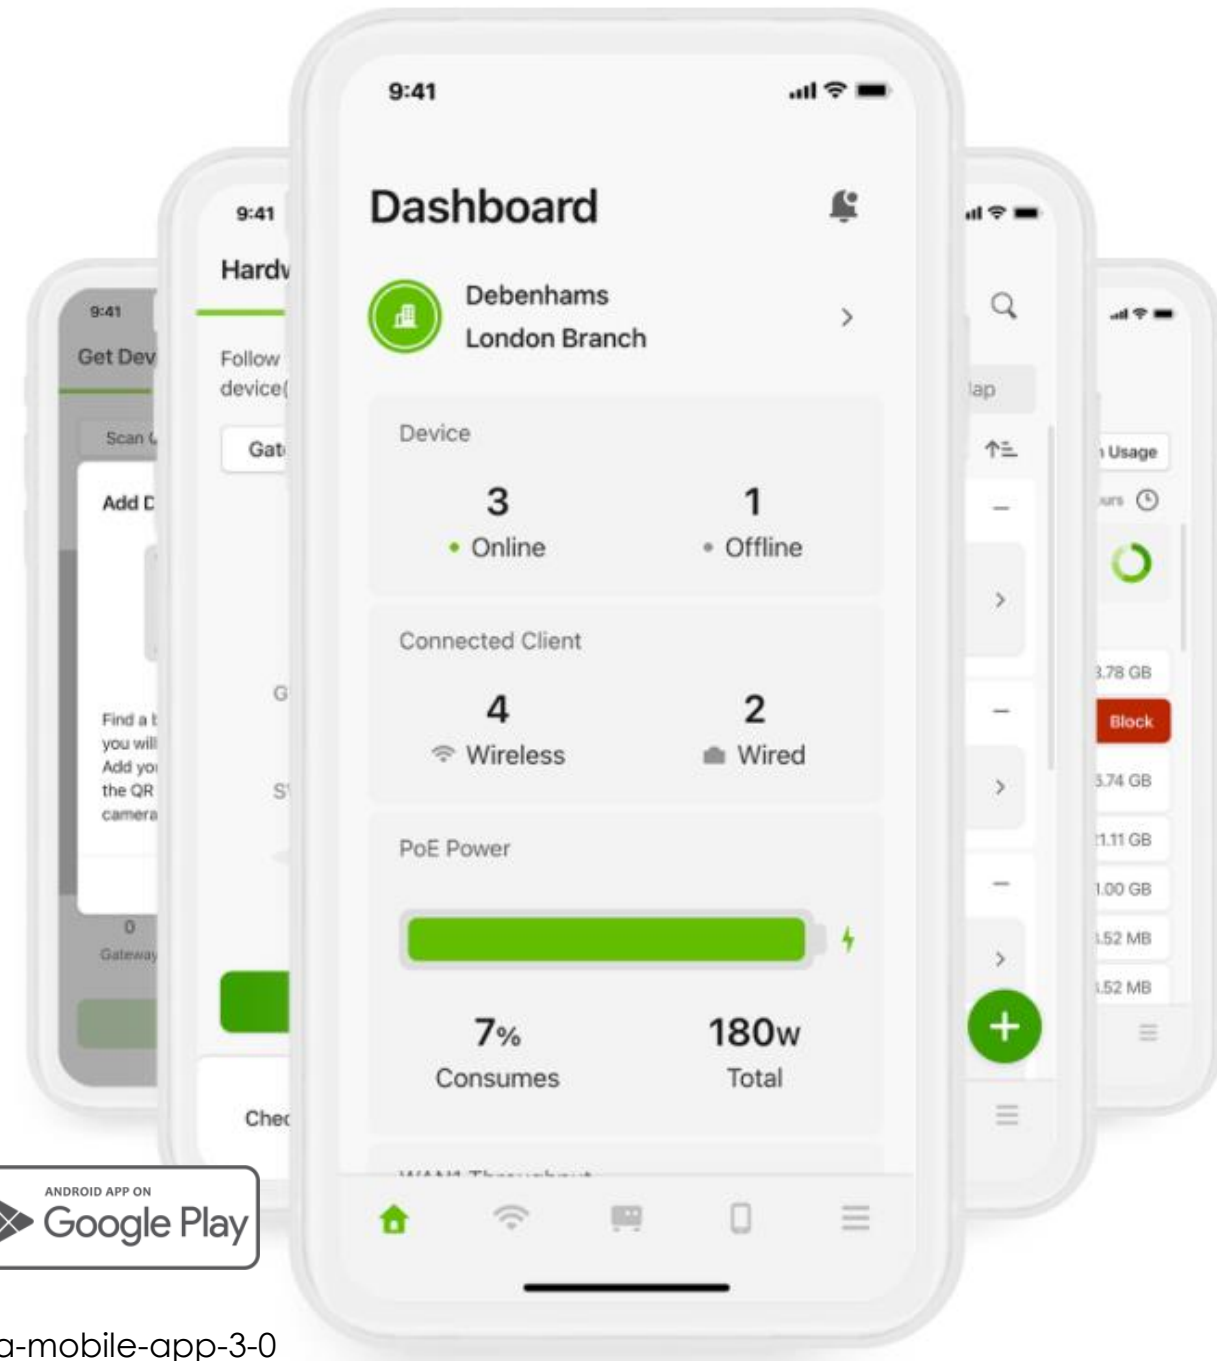

# Network on Your Palm

## Nebula Mobile App

- Sign up Nebula account
- Installation walk through wizard for creating org & site, adding devices (QR code or manually), setting up WiFi networks
- Captive portal customization
- Configure WPA3 supported
- Bandwidth usage limits for WiFi networks
- Switch ports settings & Create PoE schedule
- Configure clients policies
- View dashboard with traffic summary & AP dashboard
- Site-wide map view
- Check map and photo of device location
- Monitor No. of connected clients per device type
- Live trouble shooting tools: reboot, LED, switch port power cycle, cable diagnostics, connection test
- Create firmware upgrade schedule
- Push notifications - VPN & device down/up
- Notification center up to 7 days alert history
- Tech support and case management
  - Guide to Nebula APP:
