

Build, Grow and Scale Your Business With TD SYNnex and AWS Marketplace

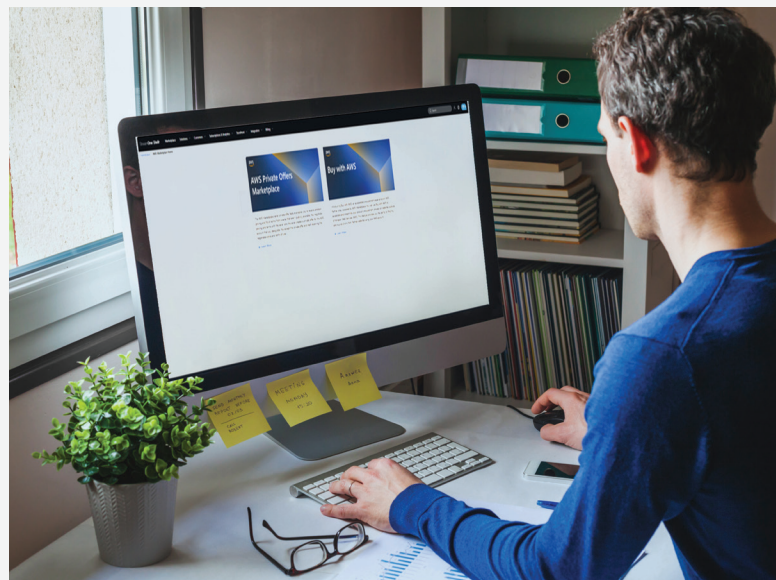

Help your customers lower costs, become more agile and innovate faster

Millions of organizations—including fast-growing startups, large enterprises and key government agencies—are using Amazon Web Services (AWS) to lower costs, become more agile and innovative faster. Many of these customers are further accelerating their digital transformation and innovation by using AWS Marketplace to discover, procure, provision and manage third-party software, data and services all in one place.

As a TD SYNnex partner, you can leverage the security, governance and procurement advantages of AWS Marketplace with the expertise and localized support of our AWS specialists.

Introducing Buy with AWS

Buy with AWS is an accelerated procurement experience powered by AWS Marketplace, and now available in StreamOne®. Buy with AWS simplifies procurement processes for the AWS Marketplace, offering partners a powerful platform to manage and expand their software and services portfolio. Quickly access, purchase and launch pre-configured software-as-a-service (SaaS) products using your AWS account with just a few clicks. Post-purchase, you can manage subscriptions in AWS Marketplace, take advantage of centralized AWS billing and leverage cost optimization tools.

How Do TD SYNnex Partners Benefit?

Our partners are able to leverage their relationship with TD SYNnex to secure distributor-exclusive pricing on the most popular SaaS solutions on AWS. Our growing list of supporting independent software vendors (ISVs) ranges from up-and-coming providers to Tier 1 companies like Cisco, IBM and Red Hat. With your TD SYNnex partnership, you can:

- Source multiple ISV SaaS solutions
- Secure distributor pricing and possibly higher margins
- Assist your customers with retiring their AWS Marketplace Private Pricing Agreement (PPA) commitments
- Accelerate your path to purchase
- Win more deals with our dedicated AWS Marketplace team of experts
