Prepare for Cisco's Last Date of Support (LDOS)

What is LDOS?

LDOS is the final deadline for Cisco support including technical help, updates, and security patches. After this date, your products will be left exposed:

- No more security fixes, leaving systems vulnerable
- No updates, risking incompatibility with new tech
- Immediate increase in operational and compliance risks

Why upgrade to new Cisco technology?

Making the switch before LDOS guarantees ongoing support and peace of mind for your business:

- Maintain robust security with ongoing patching
- Ensure seamless compatibility with emerging technologies
- Reduce the chance of unexpected downtime and costly emergency replacements
- Improve operational efficiency and compliance readiness

Act now to protect your business and upgrade before LDOS to stay secure, efficient, and compliant.

> *Did you know, only 5% of IT leaders feel equipped to support innovation[1].*

Your Cisco upgrade options:

Cisco Networking:
Secure, scalable connectivity.

Cisco Collaboration:
Seamless teamwork with Webex.

Cisco IoT:
Reliable, secure device management.

Cisco Security:
Advanced protection for users and data.

Cisco Data Center:
High-performance infrastructure.

Cisco Accessories:
Cisco-approved essentials for deployment

Need Help Navigating LDOS?

If you're unsure what LDOS means for your business or which upgrade path to choose, visit our website for more information or to get in touch with a member of our Star Team today.
