Simplify your Security Services

A simpler way to deliver managed security.

Managing multiple security solutions can create unnecessary complexity for MSPs. Disconnected tools, manual processes and complex administration can slow operations, increase costs and limit growth.

Cisco Secure MSP Center brings key security services together in a single, easy-to-use platform. Designed specifically for managed service providers, it simplifies security management, streamlines operations and helps you to deliver greater value to customers while focusing on business growth.

Whether you're looking to improve efficiency, expand your security portfolio or create new revenue opportunities, Cisco Secure MSP Center provides the foundation to help you to scale with confidence.

Why Cisco Secure MSP Center?

Single platform for managing
security services.

Simplified onboarding and
operations.

Flexible, consumption-based
commercial model.

Easier scalability as customer
demand grows.

Built to support long-term
business growth.

One Platform. Total Control

Transform the way you manage security services.

Cisco Secure MSP Center helps to eliminate the challenges associated with managing multiple security solutions across different environments.

By bringing security management into a single platform, MSPs gain greater visibility, control and operational efficiency. From customer onboarding and provisioning through to service management and reporting, everything is designed to simplify day-to-day operations.

With access to integrated security services through one management experience, MSPs can spend less time navigating complexity and more time delivering customer value.

One platform. Complete visibility. Greater control

The screenshot displays the Cisco Secure MSP Hub interface. The top navigation bar includes the Cisco logo, the text "Secure MSP Hub", and user information for "Henry" from "Future Green Solutions". A sidebar on the left lists navigation options: Overview, Customers, Products, Admins, Billing, Integrations, Trainings, and Resources. The main content area is titled "Overview" and features a hero section with the heading "Managing your business made easy" and a description of the platform's purpose. Below this, a section titled "Products available for you" showcases three product tiles: Umbrella, Secure Endpoint, and Duo, each with a brief description of its capabilities.

Overview

Managing your business made easy

Cisco Secure MSP Hub is designed to streamline your client onboarding journey, scale your business, and generate revenue faster.

Products available for you

Umbrella

Cisco Umbrella offers flexible, cloud-delivered security. It combines multiple security functions into one solution, so you can easily extend effective data protection to devices, remote users, and distributed locations anywhere in minutes.

Secure Endpoint

Speed matters when it comes to endpoint security. Detect, respond, and recover from attacks with our cloud-native solution, and reduce remediation times by as much as 85%.

Duo

Cisco Duo is a user-friendly zero-trust security platform designed to streamline access management for organizations of all sizes. With Cisco Duo, businesses can secure their workforce with powerful multi-factor authentication (MFA) and advanced endpoint visibility.

One platform. Complete visibility.

Access products, resources, insights, and updates from a centralized MSP experience.

Simplify customer management at scale.

View deployments, monitor usage, and manage multiple customers from a single dashboard.

Turn insights into growth.

Track product adoption, utilization, and performance across your entire customer base.

Grow your MSP Security business

As customer demand for security services continues to increase, MSPs need a platform that can scale alongside their business.

Cisco Secure MSP Center combines operational simplicity with a flexible business model, making it easier to expand services, support more customers and unlock new revenue opportunities.

The platform has a consumption-based approach that aligns costs with actual usage, helping MSPs to build profitable services without the burden of large upfront commitments.

Advantages

- **Flexible consumption model**
Pay only for what you use and align service costs with customer demand.
- **Monthly billing**
Simplified billing helps to improve financial predictability and operational efficiency.
- **Multi-tenant capability**
Manage multiple customers efficiently from a single environment.
- **Revenue growth opportunities**
Expand your security portfolio with services to support upsell and cross-sell opportunities.
- **Profitability at scale**
Volume-based pricing supports business growth while helping to maximise margins.

Faster delivery. Reduced complexity. Greater operational efficiency

Single management console

Manage multiple security services through one streamlined platform, reducing administrative overhead and simplifying service delivery.

Simplified operations

Improve efficiency through streamlined workflows, faster onboarding and reduced manual effort.

Better visibility

Gain access to business and service insights that help you understand customer usage and optimise service delivery.

Centralised service management

Manage customers, services and operational activity from one location to improve consistency and control.

Turn security into a growth engine

By reducing operational complexity and creating a more scalable service model, Cisco Secure MSP Center enables MSPs to focus on what matters most: growing their business and delivering exceptional customer outcomes.

Scale with confidence

- One MSLA Security Sub-SKU for multiple security services
- No upfront commitment
- Monthly usage-based billing
- One agreement for multiple customers
- No additional orders after setup
- Additional benefits for Cisco Provider Program partners

Secure Every User, Device and Endpoint

Deliver stronger protection across your customers' environments.

Today's threat landscape requires comprehensive protection across users, devices and endpoints. Cisco Secure MSP Center combines industry-leading Cisco security technologies into a unified managed services offering, helping MSPs to deliver more complete protection while simplifying administration and service delivery.

Together, these capabilities help to create a stronger, more connected security experience for customers while reducing management complexity for providers.

Identity security

Help secure user access and strengthen protection against credential-based attacks.

Internet security

Identify and block malicious destinations before threats can reach users and devices.

Endpoint protection

Detect, contain and respond to threats across endpoint environments.

Get started quickly

Cisco Secure MSP Center has been designed to make adoption straightforward:

- Simple enrolment process.
- Easy onboarding experience.
- Flexible service delivery model.
- Minimal operational complexity.
- Fast route to revenue generation.

Ready to simplify and grow?

Cisco Secure MSP Center helps MSPs:

- Simplify security operations.
- Reduce complexity and manual workload.
- Scale managed security services efficiently.
- Unlock new revenue opportunities.
- Deliver stronger customer outcomes.

Easy to Buy. Easy to Manage. Easy to Grow.

One SKU, One enrollment process and one centralized platform to manage **Umbrella**, **Duo** and **Secure Endpoint** across your entire customer base.
