Stream**One**®
Billing and Reporting

Efficient billing management, allowing partners to focus on driving business growth rather than billing tasks.

The powerful billing and reporting capabilities of StreamOne® simplify multi-cloud billing for Microsoft, AWS, and Google, and other Cloud vendors, helping partners **save time** and **reduce operational complexity**. By automating manual processes, StreamOne® enables

efficient billing management, allowing partners to focus on **driving business growth** rather than billing tasks. With the ability to save days of work each month, partners can reallocate valuable resources to other revenue-generating activities.

Billing

Billing in StreamOne® provides partners with **consolidated**, **automated** and **customizable** multi-vendor invoices, supporting flexible billing models including transactional, consumption and subscription.

Billing capabilities include:

- Custom pricing, charges, and discounts with Pricebooks
- Invoice generation
- Consolidated billing across providers
- Data reconciliation
- Usage and spend by end customer and provider
- Exchange and tax rates
- Automatic alignment with vendor pricing changes
- Detailed billing records available via API for upload to other systems

" The StreamOne® exports for billing on the monthly basis now form a **key process** internally of how we bill our customers. It really means that we're billing now as soon as we can. We're getting that cash into the business earlier, and it's **reducing** across the payment terms our cash negative flow because we've got that customer invoice data, and we can push that out as soon as possible. "

Rosemary Brandt

Reporting

StreamOne® provides **real-time reporting** and spending details on subscriptions and consumption usage. In both of these areas of functionality, users can set budget alerts, usage tracking analysis, fraud detection and other user-defined criteria to enable intelligent automation of insights.

StreamOne® offers a wide range of reports and the ability to **customize** those reports to specific needs:

- Analytics by provider
- Interactive, customizable dashboards
- Detailed consumption data with drill down
- Cost optimization
- Billing validation
- Reserved Instance optimization, allocation and inventory reports

How StreamOne® is **better**

1
Platform-native billing engine

2
Real-time billing and usage data

3
Support for transactional, consumption, and subscription-based pricing models
