

StreamOne[®]

SecOps Solution

Defend your SMB
customers and
address the growing
threat landscape
head on.

Each year, cyber-attacks are becoming more sophisticated and widespread. Small - to mid-sized businesses (SMBs) need robust security solutions to mitigate these cyber threats and prevent fraud in the cloud. The StreamOne® **SecOps Solution** is designed to provide an all-in-one view of your Microsoft customers' security posture, **helping to defend against fraudulent cloud activities.**

An **all-in-one view** of your customers' security posture.

Monitor

View all your customers' security status, threats, and recommended actions.

Manage

Standardize deployment of security policies across your customer base.

Implement

Product cross-sell recommendations to fill security gaps.

Key **benefits** for partners

Trusted advisor positioning

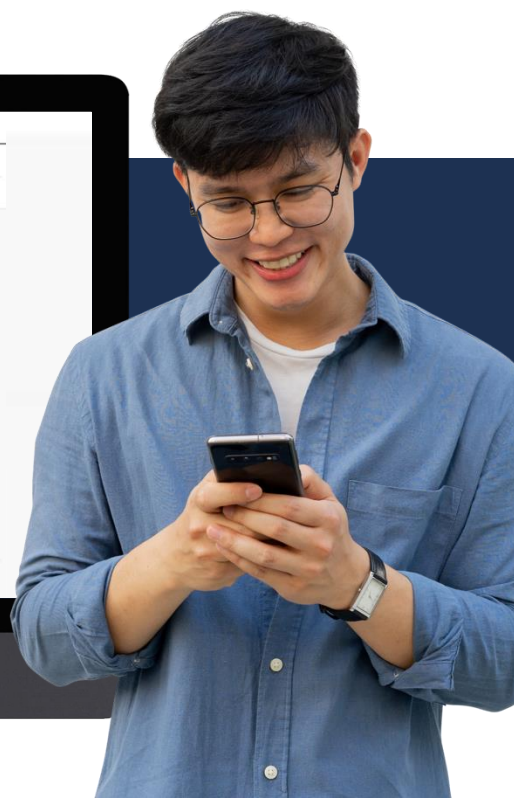

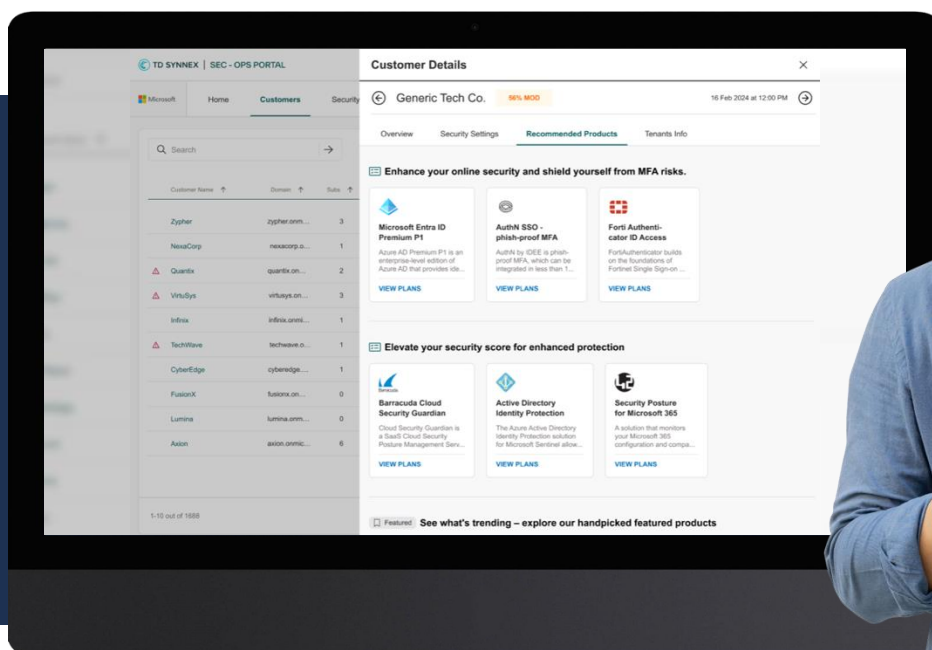

Establish yourself as a valued, trusted advisor to your customers

Cost, time & risk reduction

Deliver industry best practices for multi-level security, reducing overall costs, time investment, and associated risks

Revenue growth

Increase revenue through product recommendations and upsell opportunities that address existing security gaps.

Equip your SMB customers with the security they need to navigate today's threat landscape confidently. The **StreamOne® SecOps Solution** empowers you to provide robust, tailored, and proactive security solutions, all while positioning you as a trusted advisor.
