

Offer superior security and the best network performance with Cisco

Only the Cisco Meraki platform delivers the simplest and highest performing secure networking to dramatically reduce TCO. Offer Secure Connect, a unified SASE solution built on the Meraki platform, to enable seamless user experiences and security across branches, campuses, and remote workers.

Superior malware protection

blocks 98% of malware threats.¹
That's 25% better than the industry average.

Fastest threat protection

with Talos, the largest commercial threat intelligence team, for automatic protection against new malware in less than 10 minutes.

Zero-touch deployment

resulting in 30% faster firewall deployment, along with site-to-site VPN in only three clicks.

Best network visibility

to scale with business needs. It recognizes 27% more applications than leading competitors.²

Increased lifetime value

with 91% of customers re-purchasing Meraki converged security and networking solutions.

Proven cloud leader

and industry leader, with more than 588,700+ customers and 8.9+ million active Meraki devices.

Higher profits

with recurring revenue from licensing, and multiple upsell and cross-sell opportunities.

Simplified management

with Secure Connect, a unified SASE solution that converges cloud security, SD-WAN connectivity, and application visibility, all managed through a single pane of glass.
