TD SYNNEX AI Factory

Accelerate Innovation with an AI Proof of Concept Developed in Just Days with TD SYNNEX AI Factory

TD SYNNEX AI Factory simplifies AI adoption by accelerating the journey from use case selection to proof of concept (POC) to production. Using a large inventory of use cases, a POC can be developed in just days to quickly validate and test the business value of your AI integration before moving to pilot and production with confidence. AI Factory helps you leverage AI for innovation, business growth, and operational efficiency faster than ever.

Key Benefits of TD SYNNEX AI Factory

Using expertise and learnings from more than 4,000 modernization and 600 AI POC engagements, UnifyCloud has developed a library of use cases, ready-to-implement app models, and advanced automation to deliver Born-In-AITM apps in just days - faster than ever before. Customers can test and see real benefits before committing to full pilot and production.

Rapid AI POC Generation
Create AI POCs in days, significantly faster than traditional consulting engagements.

Innovate with AI
Pilot AI solutions in real-world scenarios and assess their impact without production pressures.

Seamless Scaling
Easily transition successful use cases to production, aligning AI solutions to strategic objectives.

Fully Automated and Scalable
Automation from start to finish minimizes manual effort and speeds deployment.

End-to-End AI Enablement
Covers the full life cycle of AI development. Start with minimal data to quickly ramp deployment.

Seamless Azure Integration
Apps are built directly in Azure, ensuring seamless scalability, security, and integration.
